LHALA Foam

Face wash and mask pack
at the same time

LALA Foam

Safe ingredients used

Ecocert and EWG safe ingredients
are used to minimize
skin irritation.

Customized cleaning and moisture care

Removes sebum on days
when there are a lot of impurities in the air, and
a cleansing mask can be used for moisture care
on days
when there are few impurities.

Slightly acidic - neutral cleansing

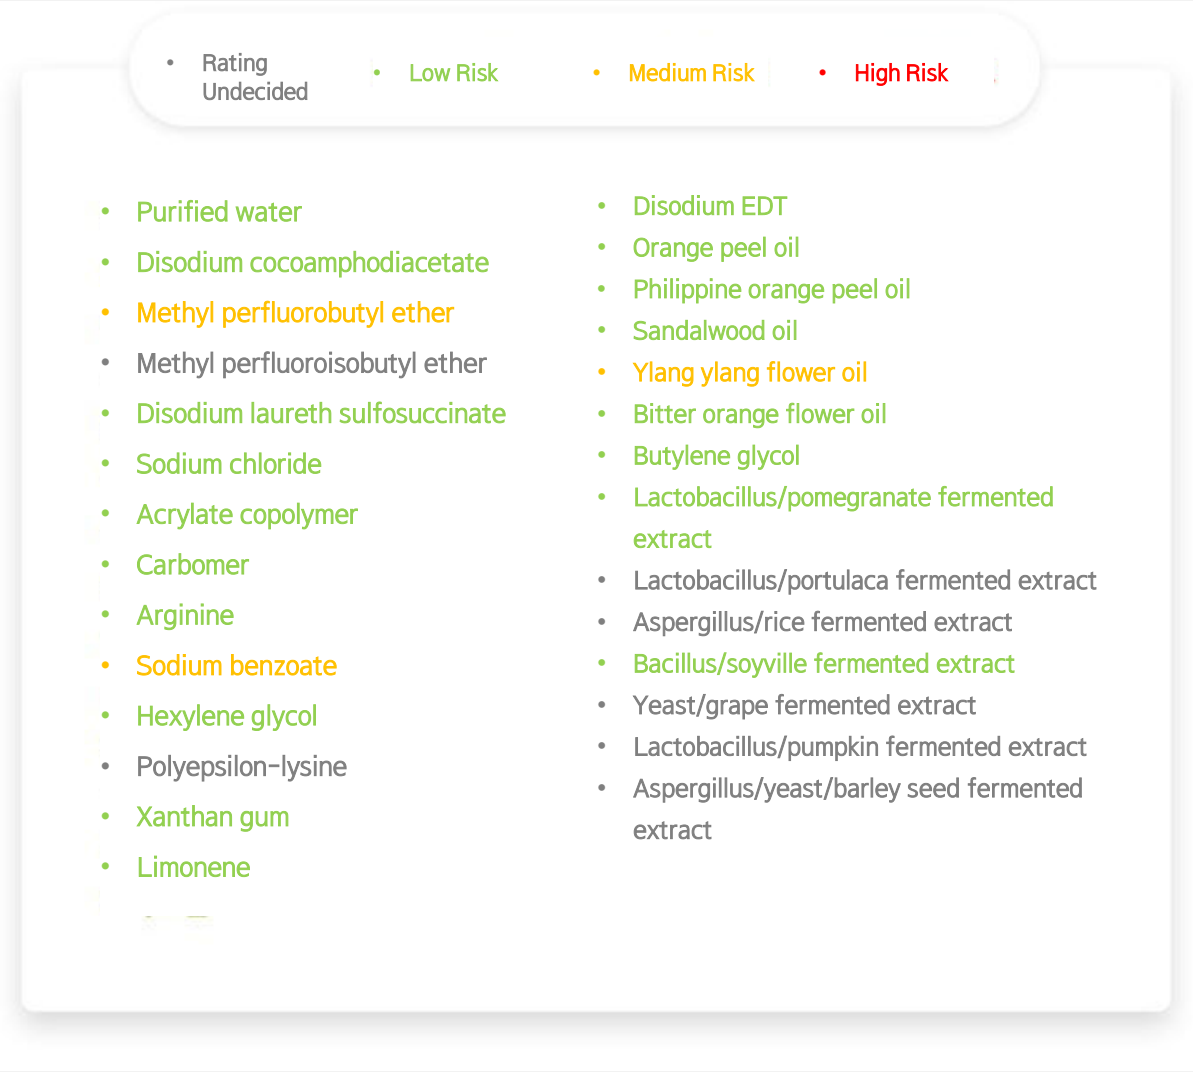

Takes care of your skin balance
with a slightly acidic-neutral cleanser
of PH 5.5 – 7.5.

Oxygen bubble cleaning

Cleanses and brightens your pores
without irritation with oxygen
bubbles.

POINT.1

A mild cleanser made using only safe ingredients, LALA Foam

POINT.2

Moisturize your face and pack at the same time without tightness

As soon as it touches the skin, the elastic and fine foam that rises helps to remove impurities accumulated on the skin surface. Forms a protective film on the skin to replenish moisture even without a pack.

POINT.3

Why should you use LALA FOAM slightly acidic-neutral?

Q. What happens to our skin when using an alkaline cleanser?

When alkaline products are used, the pH balance of the skin is disrupted, causing external bacteria or wastes to penetrate into the pores, causing problems.
If left unchecked, pores will enlarge and your skin will become dry and sensitive.

To maintain healthy skin pH 5.5-7.5 and protect the skin barrier, try using slightly acidic-neutral products.

Q. What is pH?

It is a measure of the concentration of hydrogen ions and a numerical value for acidity.

Since human skin is easily damaged if it is kept alkaline, it is important to manage it below neutral pH of 5.5-7.5. However, most cleansing products are alkaline and have strong cleansing power, but they weaken the skin barrier, making the skin more susceptible to germs and causing acne, pimples, or sensitivity, and this makes them sensitive to even trivial external factors.

In order to maintain ideal skin, it is essential to use LaLaFoam, which balances pH.

POINT.4

The disadvantages of existing cleansing have been improved.

We have improved the weak cleansing power and poor foaming, and now, the elastic and rich oxygen bubbles extract wastes accumulated in the pores to help with cleansing.

The face wash is clean and perfect, and the finish is moist without tightness.

CHECK.1

Plant-derived surfactant that does not irritate the skin.

LaLaFoam uses plant-derived surfactants
that are mild on the skin.

CHECK.2

Small, sticky oxygen bubbles.

Fine, dense bubbles arise on their own
to cleanse makeup and impurities in pores.

CHECK.3

Healthy and moist skin with six natural oils!

It soothes the skin with natural essential oils
and provides various nutrients and moisture.
